Linking our design to class discussion about people centered designs.

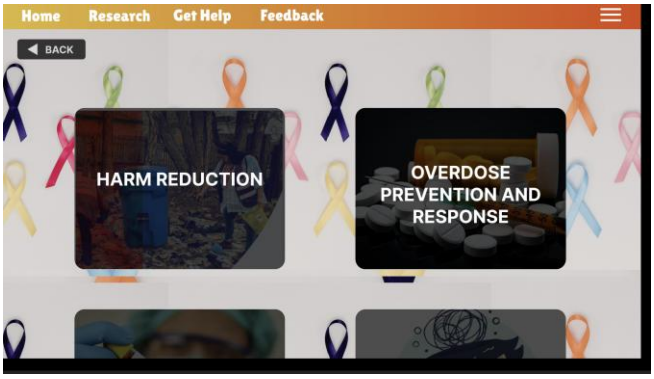

AFFORDANCES

The hamburger menu makes it easier to navigate through different tabs along with the navigation bar

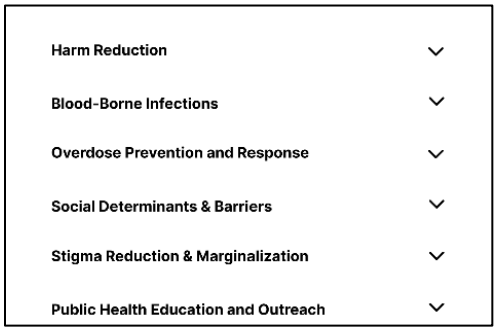

Along with the hamburger menu the search function helps to search for researches easy. Thus, making it easy to navigate directly to researches.

GESTALT PRINCIPLES

The organization under categories gives an easy idea about the researches as similar things are placed together and easy access to all the researches individual page.

CONSTRAINTS

The drop-down menu might make it harder to access multiple researches at the same time. Sometimes making it too lengthy and hard to navigate properly
